TCC Tips and Tricks

Teamcenter Community has the following pre-requisites: WindowsServer 2003, Active Directory,Windows Sharepoint Services, MS SQL Server 2000, and Unix/Linux. This may seem daunting to new and existing customers, however it should not discourage one from implementation and/or customization. This presentation covers what areas of said pre-requisites are important to understand and how one can improve performance and maintenance of an existing implementation. It will also cover tips and tricks for site migration and how to plan for upgrades. Also, suggestions on setting up development and training environments.

TCC Tips and Tricks

- Pre-Installation
- Installation
- Maintenance
- Migration
- Troubleshooting
- Q&A

Pre-Installation

- How many users?
- Necessary Hardware / Software
- Users – Internal / External
- User Platforms – Windows, OSX, etc.

Installation

- Operating System(s)
- AD – Active Directory
